## **Ivaco Rolling Mills LP (A Heico Company)**

Ivaco Rolling Mills, a major steel wire rod manufacturer in the Eastern Ontario region (Hawkesbury), is seeking a **Metallurgical Process Engineer** for its Steel Plant. Reporting to the Manager Quality Control, this person will be tasked with designing and approving steel melting and steel casting practices to meet customer and legislative requirements. The candidate will act as a resource to the Production and Quality Assurance personnel and provide engineering services in the choice or implementation of metallurgical processes employed in the Steel Plant to ensure adequate performance of the end product. This Metallurgical Process Engineer will also be responsible for coordinating trials and producing the associated engineering reports.

### Job Requirements:

- Bachelor's degree in metallurgical engineering or materials engineering.
- 3-5 years of experience with quality assurance and the steel manufacturing processes.
- Candidate must be self-driven and an excellent communicator
- Proven history of bringing complex engineering projects to term with success

### Assets:

- Bilingualism (English & French)
- PEng. designation in Ontario
- Availability to work outside of regular hours.

We offer a competitive wage and benefits package.

All interested applicants should forward their resume, in confidence, to:
